

Solutions Meet Cities Webinar on Smart Transportation

Online Webinar (via Zoom) | Sep 01 @ 2:00 GMT+9 (Korean Standard Time)

WeGO is delighted to invite you to participate in the Solutions Meet Cities Webinar on Smart Transportation

Smart transportation is an approach that incorporates modern technologies into transportation systems. This includes cloud computing, wireless communication, location-based services, computer vision, and other tools to enhance mobility. Smart transport systems worldwide enhance the safety and quality of life for everyone in urban areas.

Acknowledging the growing demand for smart transportation with the emergence of vehicle-to-vehicle technology bringing intelligent transport systems to different cities in the globe, WeGO presents Solution Meet Cities Webinar on Smart Transportation.

More importantly, in this Webinar WeGO will launch a pilot project on smart bus stations in which ten cities will be selected to have the system installed in the city! To take part in the program please share your city's interest here by filling out this short survey.

**If your city is looking for innovative technologies and solutions to improve the smart transportation sector, join the discussion!*

PROGRAM

14:00 Welcoming Remarks & Opening

- Welcoming Remarks – WeGO Secretary General, Ms. Jung-Sook Park
- Congratulatory Remarks – Seberang Perai City Council Mayor, Mr. Dato' Azhar bin Haji Arshad

14:10 Session 1 – Smart Beyond Cities

Cities officials will provide a comprehensive example of some of the latest technologies and solutions executed by cities in the field of smart transportation.
