

LASCN WORKSHOP ON DIGITAL URBAN PLANNING

Geographic Information Systems in Latin America

25 NOVEMBER 2021 | 8:00-9:30 AM KST (GMT+9)

Latin America's fast growth of urban population has created numerous urban challenges, thus making urban planning a top priority for many cities in the region. Geographic Information Systems (GIS) are among one of the most effective tools to analyze these challenges, facilitate planning, and assist in the city's decision-making process. Leading cities in the region will share their GIS and discuss future cooperation to improve them.

PROGRAM

GENERAL REMARKS

- Welcoming Remarks | WeGO Secretary General
- Congratulatory Remarks | Vice Minister of Foreign Affairs of Ecuador
- Latin America Smart Cities Network (LASCN) Introduction

SESSION 1. IMPLEMENTING GEOGRAPHIC INFORMATION SYSTEMS

- Data Alliance & FATOS Corporation

SESSION 2. GEOGRAPHIC INFORMATION SYSTEMS IN LATIN AMERICA

- Mexico City's Geographic Information System
- São Paulo's GEOSAMPA
- Lima te Cuida

SESSION 3. PANEL DISCUSSION ON FUTURE COOPERATION

Open discussion with city experts to strengthen regional cooperation. Additionally, Mexico City is opening its GIS to other cities in the region looking to implement a similar system. Join the discussion to learn more about their system.
