

Korea University - WeGO Smart City Champions

## Smart City and Energy Transition: Energy Expert Seminar

2022.09.02 - 2022.12.09 | Online

Climate change is a defining issue of our time. With the adversities faced by growing climate change on our planet, including shifting weather patterns that affect our food supply and rising sea levels that lead to flooding, action needs to be taken today to avoid more costly and harmful consequences. Cities have a unique ability to address these global challenges, especially in adapting climate and energy policy action to the current situation.

Join Korea University and WeGO for the 15-week course on “Smart City and Energy Transition”, which will provide a platform for participants to become acquainted with the diverse perspectives and experiences of major scholars and experts in the field of smart city development and energy transition

### Distinguished Lecturers
